

Sian Lennon

Senior Software Engineer

Vancouver, BC | sianlennon109@gmail.com | +1-236-998-9075 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years building and scaling backend systems and re-architecting monolithic applications into microservices across AWS, GCP, and Azure, with domain experience spanning US healthcare and telecommunications. Lead engineer experienced in driving large-scale integration projects to hard deadlines, mentoring teams, and partnering closely with product from requirements through delivery. A Python backend specialist with supplementary experience in C# and TypeScript, backed by a strong grounding in distributed systems. Recently focused on establishing processes that integrate AI safely and effectively into the software development lifecycle. Passionate about building fast, high-quality software and championing higher engineering standards—putting the practices in place to sustain them.

TECHNICAL SKILLS

Languages: Python, Go, C#, JavaScript, TypeScript, SQL

Frameworks & Libraries: FastAPI, Django, React, Aiohttp, Celery

Cloud & DevOps: AWS, GCP, Microsoft Azure, Docker, Kubernetes, Jenkins

Data & Messaging: PostgreSQL, OpenSearch, Kafka, ORM

Practices: Microservices, REST APIs, ML/NLP, Full SDLC, AI-assisted development, Team Leadership & Mentorship

PROFESSIONAL EXPERIENCE

Lantern • Vancouver, BC • *US Healthcare* Dec 2025 – Present

Senior Software Engineer Dec 2025 – Present

- **Lead engineer** on a three-person team driving the transition away from a monolith, architecting the processes and pipelines behind the company's first in-house microservices on Kubernetes within Microsoft Azure.
- Built these microservices as fully asynchronous Python services, engineered for **low latency and real-time performance** by design.
- Owned the design of a new **monitoring and alerting process** and spearheaded its implementation across the engineering organization.
- Championed responsible, secure use of **AI across the SDLC** to accelerate delivery without compromising code quality.

Accolade • Vancouver, BC • *US Healthcare* May 2024 – Dec 2025

Senior Software Engineer Aug 2025 – Dec 2025

Software Engineer III May 2024 – Aug 2025

- Drove backend development in **Python** across AWS, Django, PostgreSQL, OpenSearch, Celery, and Go.
- Led and delivered a large-scale integration to a hard deadline, migrating from task-based data ingestion to a real-time REST API supporting **10,000+ requests per hour**.

Telnyx • Dublin, Ireland • *Telecommunications* Mar 2019 – May 2023

Software Engineer / Junior Software Engineer Jun 2021 – May 2023

- Built asynchronous **Python** backends on GCP using Jenkins, FastAPI, Aiohttp, Docker, Kubernetes, and SQL/ORM-backed relational databases.

- Contributed to migrating monolithic systems toward a microservices architecture, improving modularity and resilience.
- Created and maintained ML services to proactively detect and block fraud and abuse, **reducing fraud by 95%** within the first three weeks.
- Took part in a monthly on-call rotation, providing production support and incident response for live services.

NOC Automation Engineer Jun 2020 – Jun 2021

- Led development and maintenance of Kubernetes-managed frontend and backend cloud infrastructure supporting internal teams.

NOC Support Engineer Apr 2019 – Jun 2020

- Investigated VOIP issues spanning SIP, RTP, and vendor-side problems.

EDUCATION

BSc in Computer Applications (Software Engineering) 2020

Dublin City University — First Class Honours (1.1)

PROJECTS & SPEAKING

- **Speaker, PyCon Italy 2022 — “Using Cookie Cutters”**: Presented at the Python conference on streamlining project scaffolding with Cookiecutter templates.
- **Portfolio Website (2024)**: Designed and built a personal portfolio in TypeScript and React.
siananigans.github.io/portfolio
- **NLP Question Extractor (2020)**: Prototyped an ML/NLP service to extract questions from free text and HTML pages—a personal favorite project.
